1966 FORD F250

This mid 60's classic has been lovingly restored and is the most recent addition to our fleet of hearses. The two tone turquoise and gull white paint finish has been preserved; making for a bold departure from the traditional black associated with funeral vehicles.

Power arrives from a Ford 352 FE Series V8 engine creating a distinctive rumble which can be heard before it's seen.

The cabin can carry two family members in elevated comfort to ride as escort while the casket is conveyed on a finely crafted solid rimu timber deck. This features both scissor lift engineering for presentation and also a canopy for discrete, all weather travel.

The hearse features a unique scissor lift at the back, enhancing its functionality for funeral services. This innovative lift allows for effortless raising and lowering of the casket.
